PROFESSIONAL SUMMARY

Computer Science Graduate with a strong foundation in Full-Stack Web Development and Data Science. Proficient in building robust Node.js/Express applications, managing MySQL databases, and developing predictive Python models. Passionate about bridging the gap between data-driven insights and user-centric software.

EDUCATION

CV Raman Global University, Bhubaneswar (CGPA: 7.6/10)

Oct 2021 - June 2025

Bachelor of Technology in Computer Science and Engineering

Relevant Coursework:-Data Structures, Object-Oriented Programming, DBMS, Operating Systems, Application Programming

Suddhananda Vidyalaya, Cuttack

April 2018 - Mar 2020

Intermediate

Physics, Chemistry, Math, Physical Education

PROJECTS

APEXCORE-ATM | Node.js, Express, MySQL, JavaScript

- Developed a secure full-stack ATM web platform featuring a responsive UI and RESTful backend services.
- Built secure REST APIs for authentication, balance updates, transfers, and real-time transaction history.
- Implemented strict input validation and database-driven ledger updates in MySQL to maintain data integrity.
- Streamlined debugging by adding backend diagnostics to surface underlying MySQL query errors.
- Integrated secure authentication mechanisms to protect user data and ensure authorized account access.

Titanic Classification | Python, Machine Learning, Data Science

- Utilized the Titanic dataset from Kaggle to predict passenger survival outcomes.
- Preprocessed data by handling missing values, encoding categorical variables, and scaling features.
- Trained classification models such as logistic regression and random forest.
- Achieved around 83% accuracy in predicting survival on validation data.
- Evaluated model performance using accuracy, precision, and recall metrics.

INTERNSHIP EXPERIENCE

- Practical Cyber Security for Cyber Security Practitioners** – NPTEL, IIT Kanpur (July 2024 – October 2024) Achieved Elite certification with a consolidated score of 76%.
- Industrial Training in Data Science** – LearnWik Solutions Pvt. Ltd. (April 2023)
Successfully completed industrial training in Data Science, covering core concepts and practical applications

SKILL

- Programming:-** Python, JavaScript, C++
- Data & ML:-** Pandas, NumPy, Data Analysis, Machine Learning
- Databases:-** MySQL, DBMS
- Web Development:-** Node.js, Express, HTML, CSS, Responsive Web Design
- Tools:-** Jupyter Notebook, VS Code, GitHub
